WORK EXPERIENCE

Member Of Technical Staff Innobit Systems

06/2022 - Present

Roles and Responsibilities

- Designed high-level and low-level architectures and detailed database schemas, focusing on normalization, indexing, and performance optimization.
- Engineered scalable, secure REST APIs using Node.js, Typescript, ExpressJS, and Sequelize, and integrated AWS services like Cognito, SES, SNS, and Lambda. Secured REST APIs with JWT authentication and AWS tokens, managing user tokens with AWS Cognito for secure and seamless access control.
- Managed databases including MySQL, Postgres, and MongoDB, implementing schemas, writing complex queries, and optimizing performance for large data volumes.
- Implemented messaging queues with RabbitMQ and real-time communication features using WebSockets and Socket.IO to enhance user engagement.
- Designed and developed subscription-based applications, integrating PayPal and Stripe payment gateways for secure transactions in India and the US.
- Utilized Docker for containerizing applications, ensuring consistent development, testing, and production environments, and improving scalability and deployment.

Member Of Technical Staff (Trainee) Innobit Systems

01/2022 - 05/2022

Achievements/Tasks

- Developed two projects from initial concept to MVP, transforming Figma designs into interactive, responsive UIs using React, Typescript, and Redux.
- Implemented UIs for React web applications by integrating and customizing design libraries such as ANTD and Material UI with attention to detail.
- Utilized data visualization libraries like AM Charts and Chart.js for effective data display.
- Developed reusable UI components using HTML, CSS, and LESS. Used AXIOS, Redux, Redux Toolkit, and RTK Queries for state management and API integration in web applications, ensuring efficient data handling and seamless user experiences.

EDUCATION

B.Tech (Computer Science) ABESIT Institute Of Technology

08/2018 - 07/2022

Ghaziabad, Uttar Pradesh, India
